

This agreement must be signed before use of RoboCoupe

Always follow P.U.N.C.H (power off, unplug, neatly disassemble, clean, hands off) when using the RoboCoupe. When using the RoboCoupe you must always load product with the machine turned OFF. You can only use the hg provided RoboCoupe plungers when working with these units. Never load or put your hands into the machine while the machine is running or plugged in!

Follow these steps:

1. Produce is cleaned, washed and spun
2. Put machine together with correct blade
3. Add produce into large chute (machine turned off)
4. Put plunger on top to push product in and then turn on machine
5. Once it's finished turn OFF machine
6. Repeat steps 1-5 EVERY time produce is inserted into the RoboCoupe

Acknowledgement:

I have been trained on the proper use of the RoboCoupe. All of my questions have been answered by my manager and I feel confident to use the machine. I understand the requirements for using the RoboCoupe are:

- Follow P.U.N.C.H. while using the RoboCoupe
- Comply with the RoboCoupe safety instructions
- Failure to comply can result in serious injury and disciplinary action up to and including termination.
